Office Action Summary	Application No. 10/625,234	Applicant(s) TANI, KENTARO	
	Examiner A. Sefer	Art Unit 2826	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I (claims 1-4) in the reply filed on June 29, 2004 is acknowledged; and claims 5-8 have been withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

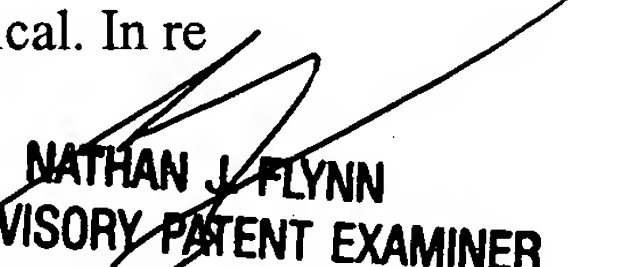

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bestwick et al. ("Bestwick") USPN 5,888,844.

Bestwick discloses (fig. 1 and col. 4, lines 54-59) semiconductor light emitting device, comprising: a semiconductor substrate; a stacked semiconductor structure formed on the semiconductor substrate; a striped ridge structure; and a semiconductor current confinement layer 8 provided on a side surface of the striped ridge structure; wherein the stacked semiconductor structure includes a first semiconductor clad layer 2, a semiconductor active layer 3, a second semiconductor clad layer 4, and a semiconductor etching stop layer 5; wherein the striped ridge structure includes a third semiconductor clad layer 4, a semiconductor intermediate layer 6, and a semiconductor cap layer 7; wherein the striped ridge structure is provided on the semiconductor etching stop layer; wherein an interface between the semiconductor current confinement layer and the semiconductor etching stop layer and an interface between the

Art Unit: 2826

semiconductor current confinement layer and the striped ridge structure each having impurities (col. 2, lines 43-50) and wherein the impurities are carbon/oxygen based (as in claims 2-4).

As for the content of impurities, the specification contains no disclosure of either the critical nature of the claimed arrangement or any unexpected results arising therefrom. Where patentability is said to be based upon particular chosen dimensions or upon another variable recited in a claim, the applicant must show that the chosen dimensions are critical. In re Woodruff, 919 F.2d 1575, 1578, 16 USPQ2d 1934, 1936 (Fed. Cir. 1990).
